despite america s pluralistic fragmented and generally adversarial political culture participants in pollution control politics have begun to collaborate to reduce the high costs of developing implementing and enforcing regulations edward p weber uses examples from this traditionally combative policy arena to propose a new model for regulation pluralism by the rules a structured collaborative format that can achieve more effective results at lower costs than typically come from antagonistic approaches weber cites the complexity and high implementation costs of environmental policy as strong but insufficient incentives for collaboration he shows that cooperation becomes possible when opposing sides agree to follow specific rules that include formal binding agreements about enforcement commitment to the process by political and bureaucratic leaders and the ensured access and accountability of all parties involved such rules establish trust create assurances that agreements will be enforced and reduce the perceived risks of collaboration through case studies dealing with acid rain reformulated gasoline and oil refinery pollution control weber demonstrates the potential of collaboration for realizing a cleaner environment lower compliance costs and more effective enforcement challenging the prevailing view that endless conflict in policymaking is inevitable pluralism by the rules establishes a theoretical framework for restructuring the regulatory process

in the first ever theoretical treatment of the environmental justice movement david schlosberg demonstrates the development of a new form of critical pluralism in both theory and practice taking into account the evolution of environmentalism and pluralism over the course of the century the author argues that the environmental justice movement and new pluralist theories now represent a considerable challenge to both conventional pluralist thought and the practices of the major groups in the us environmental movement much of recent political theory has been aimed at how to acknowledge and recognize rather than deny the diversity inherent in contemporary life in practice the myriad ways people define and experience the environment has given credence to a form of environmentalism that takes difference seriously the environmental justice movement with its base in diversity its networked structure and its communicative practices and demands exemplifies the attempt to design political
