think of your local church without art music song dance etc it would be a much poorer place but if protestants have any vision for the arts it tends to be a thin one this unique book is an attempt to contribute to a robust expansive vision for the church and the arts its specific aim is to show how the many

parts of the landscape of church and art hold together you can think of it as a kind of helicopter flyover but one with expert pilots the guides include the likes of eugene peterson lauren winner jeremy begbie andy crouch and john witvliet helping to inspire readers and empower pastor leaders with a vision of the church and the arts that is compelling far seeing and profoundly transformative

data poetry is a collection of short computer generated texts and visual poems that explore the technologies and concepts of the digital world jörg piringer uses concepts that enable smart phones to understand language that help email programs to filter out spam messages and that help websites to translate texts but he tricks them all into creating playful poetry in data poetry an artificial intelligence explains how it would write a book if it were allowed to a program learns how to write nonsense proverbs automatic translators reveal their gender bias and internet searches expose the secret wishes of twitter users the book is at once an artistic and entertaining perspective on the influence of digital language technology and its consequences

temporal divergence creates a need for new narratives and paradigms in diverging time david carvounas supports this assertion through detailed expository and diagnostic readings of kant hegel and marx he focuses on their contribution to our understanding of modernity as an epochal shift in the relationship between past and future recasting the significance of the past and future of the modern present despite their different solutions to the problem of temporal coordination they urged the modern world to look not to the past but to the newly opened future for continuity meaning and purpose this book not only offers a fresh look at a defining characteristic of modernity but also makes a compelling case that a coherent modern temporal structure requires a sustainable orientation toward the future an orientation that kant hegel and marx delineate in distinctive and powerful ways

from the beginning of time humans have been driven by both a fear of the unknown and a curiosity to know we have always yearned to know what lies ahead whether threat or safety scarcity or abundance throughout human history our forebears tried to create certainty in the unknown by seeking to influence outcomes with sacrifices to gods preparing for the unexpected with advice from oracles and by reading the stars through astrology as

scientific methods improve and computer technology develops we become ever more confident of our capacity to predict and quantify the future by accumulating and interpreting patterns from the past yet the truth is there is still no certainty to be had in this very short introduction jennifer gidley considers some of our most burning questions what is the future is the future a time yet to come or is it a utopian place does the future have a history is there only one future or are there many possible futures she asks if the future can ever be truly predicted or if we create our own futures both hoped for and feared by our thoughts feelings and actions and concludes by analysing how we can learn to study the future about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

the proceedings of the economics and business competitiveness international conference ebcicon provides a selection of papers either research results or literature reviews on business transformation in the digital era nine major subject areas comprising accounting and governance customer relations entrepreneurship environmental issues finance and investment human capital industrial revolution 4.0 international issues and operations and supply chain management are presented in the proceedings these papers will provide new insights into the knowledge and practice of business and economics in the digital era therefore parties involved in business and economics such as academics practitioners business leaders and others will be interested in the contents of the proceedings

biodiversity can provide a series of important ecosystem functions and ecosystem services which meet the needs of human beings plants are the biological group with the highest carbon content on earth their diversity has attracted increased attention the interpretation of plant diversity patterns and drivers is crucial for the conservation and utilization of plant resources and is also one of the hot topics in plant science and ecology there are already many studies on the patterns and drivers of plant diversity including different diversity dimensions e g taxonomic phylogenetic and functional diversity and spatial scales different plots sites watershed country continent and globe the mechanisms underlying plant diversity patterns are also

quite complex for example many hypotheses are related to contemporary climate and soil conditions with temperature precipitation and soil nutrient being the most discussed drivers in addition paleoclimate and geological events may also have a strong legacy on current plant diversity patterns except for these natural factors many anthropogenic activities including agriculture deforestation grazing urbanization and coal mining are also important drivers of plant diversity these anthropogenic activities can affect plant diversity patterns not only directly but also indirectly through their effects on habitat loss and habitat fragmentation therefore the current plant diversity patterns are the result of many interacting factors and need to be interpreted from a more comprehensive perspective this research topic will therefore provide a platform for sufficient communication aiming to integrate the research from different fields and deepen the understanding of the patterns and drivers of plant diversity we encourage the submission of theoretical and experimental studies on different plant groups such as seed plants ferns mosses and algae studies based on new methods and technology such as genomics and drones are also welcomed we welcome the following specific topics effects of historical factors such as paleoclimate geological events on plant diversity plant diversity that driven by contemporary climate and anthropogenic activities the effect of habitat loss and fragmentation on plant diversity new methods of research on the patterns and drivers of plant diversity
